Disclosures

The abatement calculator is prepared by Baker Tilly Municipal Advisors, LLC, in conjunction with Hoosier Energy, based on current Indiana law. This calculation is intended to provide an ILLUSTRATIVE and PRELIMINARY indication of the level of property taxes and potential property tax savings for a proposed investment based on the assumptions provided by the user and those outlined below. These illustrative calculations should not be relied upon for the purposes of inclusion in legal documents including, but not limited to, incentive agreements or resolutions approving property tax abatement, nor should they be construed as tax advice. Taxpayers must consult their own tax and legal advisors to determine their actual tax liability and to prepare their required annual Indiana property tax filings. Please read the Disclosures carefully.

To be eligible to receive property tax abatements in Indiana, a company must follow a specific application process. Please contact your Hoosier Energy Representative for further guidance.

Assumes taxes payable 2026 certified property tax rates, as provided by the Indiana Department of Local Government Finance. No assumption has been made for tax rate changes in subsequent years.

It is assumed that the Circuit Breaker Tax Credit, which limits property tax liability to 3.0% of gross assessed value for commercial and industrial properties, is applied.

This calculation does not account for the application of the Local Income Tax (LIT) Property Tax Replacement Credit (PTRC) in any jurisdictions in which a LIT PTRC is applicable. The application of the LIT PTRC may reduce the property tax liability and the impact of the Circuit Breaker Tax Credit for a commercial/industrial taxpayer. Pursuant to HEA 1210-2026, the LIT for Property Tax Relief, which funds the LIT PTRC, will expire following the 2028 tax year.

Assumes a one-time investment in real and personal property. Staggering the investments may have a material effect on the actual value of property tax abatements.

Real Property:

- Real property will be assessed by the appropriate local assessing official. ***The actual assessed value of a real property improvement will be determined upon completion, and the assessed value may vary materially from the cost of the improvement.***

- Real property in Indiana is subject to annual adjustments of assessed value to the market value of the structure based on annual sales data ("Trending").

Depreciable Personal Property:

- In order to be eligible for personal property tax abatement, the property must meet certain criteria defined in the Indiana Code and the Indiana Administrative Code. Taxpayers should consult their tax advisors and/or local officials regarding the eligibility requirements for personal property tax abatement.

- All personal property (equipment) is assumed to be new and is assumed to be depreciated in Pool #2 (5-8 year depreciable life) for property tax purposes. A mixture of new and existing equipment (as well as a mixture of depreciation pools) will produce different tax savings results.

- On April 15, 2025, Governor Mike Braun signed SEA 1-2025 into law. This legislation removed the 30% "depreciation floor" for all business personal property placed in service after January 1, 2025, which is not located within a tax increment allocation area ("TIF Area") established prior to January 1, 2025. The estimates contained herein account for the application the 30% depreciation floor for all business personal property marked as located within a TIF Area established prior to January 1, 2025.

- Includes the calculation of Minimum Value Ratio (MVR) for tax abatement of personal property located within a tax increment allocation area established prior to January 1, 2025, which effectively increases the assessed value used in the abatement calculation when the taxpayer is subject to the 30% depreciation floor. The MVR equals the adjusted assessed value at the 30% floor divided by the depreciated assessed value of the equipment.

- The calculation of illustrative personal property tax liability and abatement savings does not account for the presence of any existing in-service personal property that may be owned by the taxpayer. The presence of existing in-service personal property may materially impact these calculations.

Pursuant to IC 6-1.1-3-7.2(d), business personal property taxpayers who report a total acquisition cost of personal property within a county of $2,000,000 or less for the 2026 assessment date and after are exempt from personal property taxation.

The property tax abatement savings value is an illustrative value based on preliminary information entered into this calculator. Actual abatement savings may differ materially from the results of this calculator based on the timing of the investment, actual assessment of structures upon completion by the local assessing official, differences in depreciation pools for personal property, annual changes in tax rates, changes to Indiana property tax law or regulations, or changes in assessment methodology.
